Re: Barclay - Cotinine

Dear Harry:

I enclose a recent publication of the Tobacco Advisory Council, "Monograph on the Pharmacology and Toxicology of Nicotine." I thought it might be useful in connection with our investigation of the cotinine question since it appears to contain everything and more that one might wish to know about nicotine metabolism.

The discussion on page nine under "Blood Levels of Nicotine" appears to be the section most relevant to our present research.

Sincerely,

Alexander Holtzman
